Personal Statement

A highly adaptable and results-driven professional with a strong foundation in business operations, digital technology, and customer relations. Combines analytical problem-solving with excellent communication skills to streamline workflows, manage digital projects, and act as a liaison between technical systems and business objectives. A quick learner with a proven track record in IT management, process automation, and high-performance sales, equipped to bring operational efficiency and strategic value to cross-functional teams.

Key Skills

- Operations & Strategy: Process Optimization, Project Coordination, Data Analysis, Workflow Automation.
- Communication & Sales: Client Engagement, Technical Liaison, Customer Service, B2B/B2C Relations.
- Technical Proficiency: IT Infrastructure Support, Database Administration (Airtable), HTML5, Python, BPMN.
- Software & Tools: Advanced MS Office (Excel, Word, Outlook), Google Workspace, Power BI, CRM Systems.
- Languages: English (Native C2), Polish (Native C2).

Education

Birmingham City University BSc Business and Information Technology (2022-2025) - 2:1

- Relevant Modules: Business Process Modeling, Data Analytics, Systems Architecture, Python Programming.

Bishop Challoner Catholic College A Levels (2020-2022): ICT - A*, Computer Science - B, Business - C

Work Experience

NYX Nieruchomości | Process Automation Specialist (July 2025 - March 2026)

- Data Pipelines & APIs: Engineered automated Python (Pandas) data pipelines and API integrations, eliminating manual data entry and saving 15+ hours of administrative work weekly.
- Process Optimization: Mapped business workflows (BPMN) and deployed custom Google Workspace/MS Office scripts, reducing document generation time by over 50%.
- Database & BI: Administered relational databases (Airtable) for 5,000+ records and translated raw data into interactive Power BI dashboards, improving lead tracking efficiency by 30%.

Bishop Challoner Catholic College *IT Technician* (July 2021 - June 2022)

- Infrastructure Support: Provided critical Tier 1/2 technical support for a campus-wide network, ensuring 99% uptime for systems supporting 500+ users.
- System Administration: Managed the full lifecycle of device provisioning and network access control, streamlining the deployment of 100+ workstations.
- Technical Liaison: Translated complex technical diagnostics into actionable guidance for non-technical staff, significantly improving department-wide digital literacy.

Certifications

- Python for Data Science (IBM) | Introduction to Generative AI (Google)
- Power BI for Data Analysis (Simplilearn) | SQL and Relational Databases (IBM)

Early Career

Cell Tech | Customer Service (2018-2019) – Handled hardware repairs and sales, driving a 30% revenue increase.

Interests and Achievements

- Independent Digital Projects: Consulted for private clients to deliver custom web, data, and automation solutions, demonstrating strong project management and self-motivation.
- Financial Market Research: Experienced in stock investing and futures trading, utilizing data-driven research and rigorous risk management frameworks.
